

Background

Set against a backdrop of constant product and regulatory evolution, the ISLA Post Trade Conference has become a point of continuity over the years.

This year's event will once again be focused primarily on groups and individuals involved in the daily operational and post trade flows associated with the securities finance business. An interesting mix of keynote presentations, industry updates, and panel discussions; all designed to explore the various business and regulatory drivers affecting the post trade environment and how they might shape the future.

This Autumn, ISLA will be returning to London to deliver our Annual General Meeting (AGM), followed by the 12th Annual Post Trade Conference.
